

# Mutasim Sweileh

## Full Stack Developer

I am a full-stack developer with more than six years of successful experience. I do love coding. This is my life. I am eager to find unique solutions and implement them in my code to make my clients happy and solve their business tasks and problems, so my client can enjoy the result. I maintained multiple ongoing projects by prioritizing, setting timelines & assigning tasks to team members, and Implementing pipelines for continuous delivery and deployment(CI/CD) incorporating automated testing. I love to code a lot, but I am passionate about business and development, so I created some special projects and went on a lot into the problems of projects and how to succeed.
